One of the missed Winter NAMM products is this new drum machine by Alesis released after the more than 15 years success of the SR-16. The **Alesis SR-18 Drum Machine** sound range covers almost any kind of music and has some interesting drums, hits, electronic drums, percussion and bass sounds.

The **Alesis SR-18 Drum Machine** features 24-voice polyphony, 32MB percussion and bass sounds, built-in effects (reverb, EQ and compression), 12 drum pads, transport controls, value/tempo jog wheel, pattern-trigger pad, drum roll and mute/solo functions, 100 factory and 100 user presets, backlit LCD, 1/4" input, 1/4" aux and headphones outputs and MIDI connections.

This drum machine can be controlled by footswitch pedals, the available functions for this controllers are start/stop and A-B fill/count. The **Alesis SR-18 Drum Machine** is now available and its price is \$250.
